

Description of Additional Supplementary Files

File name: Supplementary Movie 1

Description: Representative movies showing the effect of the various treatments on adult worm motility at 3 min after ESP exposure. Adult male worms, or adult female worms, cultured for 24 h were exposed to media containing ESPs from opposite sex adult worms or left untreated, and 30 s-movies recorded at indicated time points. Worms were also incubated in 20 μ M SB203580, 20 μ M U0126, or 50 μ M U0126 for 1 h prior to ESP exposure.

File name: Supplementary Data 1

Description: Source data for graphs in the paper.
