

Description Of Additional Supplementary Files

File name: Supplementary Data 1

Description: Difference in concentrations of 2944 proteins associated with 1-SD higher BMI, BF%, WC and WHR in conventional and genetic analyses

File name: Supplementary Data 2

Description: MR sensitivity analyses

File name: Supplementary Data 3

Description: List of significantly enriched biological process terms of adiposity-related proteins

File name: Supplementary Data 4

Description: PheWAS associations of cis-pQTL for proteins showing causal relationship with general and central adiposity in adiposity-to-protein direction after Bonferroni correction

File name: Supplementary Data 5

Description: List of 2944 proteins quantified by the Olink Explore I and Olink Explore II assay
