

*Supplemental Figure 1. Growth chronologies by site, detrended by RCS and trimmed to the earliest year where subsample signal strength > 0.8 (Teslin = 1914, Lower Morley = 1868, Nisutlin = 1833, Seaforth = 1821. Upper Morley = 1772).*

*Supplemental Figure 2.* Locations of sonar studies which collected data used in this study.
