

Reporting Summary

Nature Portfolio wishes to improve the reproducibility of the work that we publish. This form provides structure for consistency and transparency in reporting. For further information on Nature Portfolio policies, see our [Editorial Policies](#) and the [Editorial Policy Checklist](#).

Statistics

For all statistical analyses, confirm that the following items are present in the figure legend, table legend, main text, or Methods section.

n/a	Confirmed
☐	☒ The exact sample size (<i>n</i>) for each experimental group/condition, given as a discrete number and unit of measurement
☐	☒ A statement on whether measurements were taken from distinct samples or whether the same sample was measured repeatedly
☐	☒ The statistical test(s) used AND whether they are one- or two-sided <i>Only common tests should be described solely by name; describe more complex techniques in the Methods section.</i>
☐	☒ A description of all covariates tested
☐	☒ A description of any assumptions or corrections, such as tests of normality and adjustment for multiple comparisons
☐	☒ A full description of the statistical parameters including central tendency (e.g. means) or other basic estimates (e.g. regression coefficient) AND variation (e.g. standard deviation) or associated estimates of uncertainty (e.g. confidence intervals)
☐	☒ For null hypothesis testing, the test statistic (e.g. <i>F</i> , <i>t</i> , <i>r</i>) with confidence intervals, effect sizes, degrees of freedom and <i>P</i> value noted <i>Give P values as exact values whenever suitable.</i>
☐	☒ For Bayesian analysis, information on the choice of priors and Markov chain Monte Carlo settings
☐	☒ For hierarchical and complex designs, identification of the appropriate level for tests and full reporting of outcomes
☐	☒ Estimates of effect sizes (e.g. Cohen's <i>d</i> , Pearson's <i>r</i>), indicating how they were calculated

Our web collection on [statistics for biologists](#) contains articles on many of the points above.

Software and code

Policy information about [availability of computer code](#)

Data collection	No specific software was used in data collection.
Data analysis	Genome size estimation and assembly : fastp (v 0.19.3), pbccs (v4.02), Jellyfish (v2.2.10), genomescope (v2.0), Hifiasm (v0.16.1), purge_dups tool (v1.25), Hi-C-Pro (v2.11.4), BWA (v0.7.17), ALLHiC (v0.9.13), Juicebox (v1.11.08), HapHiC (v1.0.6), TIDK (v0.2.63), and Circos (v0.69.8) Genome assembly evaluation and annotation : minimap2 (v2.22), BWA, HISAT2 (v2.1.0), BUSCO (v5.3.0), LTR_FINDER_parallel, LTRharvest, LTR_retriever, Merquy (v1.3), RepeatModeler package (v1.0.8), RepeatMasker (v4.07), TEclass (v2.1.3), TRF package (v0.9), GETA (v2.4.12), GetaFilter, tRNAscan-SE (v2.0.9), RNAmmer (v1.2), and INFERNAL (v1.1.2) RNA-seq data mapping and transcriptomic analyses: fastp, HISAT2, Samtools (v 1.6.2), FeatureCounts (v1.6.2), DESeq2 (v1.22.1), corrrplot package (v0.84), base (v3.5.1) package, and clusterProfiler (v 4.6.1) Analysis of volatile compounds by a widely-targeted metabolomics method: ComplexHeatmap (v 2.8.0) and MetaboAnalystR (v 1.0.1) Analysis of protein-coding genes and transcription factors related to floral aroma synthesis: MCScanX, HMMER (v3.1), Muscle (v3.8.1), RAXML (v8.2.12), iTOL, iTAK, and TBtools

Transcript-metabolite network analysis:
base package (v3.5.1), Hmisc (v4.4.0) package, and Cytoscape (v3.7.1)

Weighted gene co-expression network analysis:
WGCNA (v4.02), Cytoscape (v 3.7.1), and DNAMAN (v 10)

Validation of quantitative real-time PCR:
Primer Premier (v 5.0)

For manuscripts utilizing custom algorithms or software that are central to the research but not yet described in published literature, software must be made available to editors and reviewers. We strongly encourage code deposition in a community repository (e.g. GitHub). See the Nature Portfolio [guidelines for submitting code & software](#) for further information.

Data

Policy information about [availability of data](#)

All manuscripts must include a [data availability statement](#). This statement should provide the following information, where applicable:

- Accession codes, unique identifiers, or web links for publicly available datasets
- A description of any restrictions on data availability
- For clinical datasets or third party data, please ensure that the statement adheres to our [policy](#)

The Illumina RNA-sequencing raw data of "Hutou" jasmine (*Jasminum sambac* var. *Trifoliatum*, MP) transcriptome across different tissues are available in the Genome Sequence Archive (GSA) (<https://ngdc.cncb.ac.cn/gsa/>), part of the National Genomics Data Center (NGDC), under the accession number CRA012747. The "Hutou" jasmine genome are publicly available in the NGDC under project number PRJCA019962. The reviewer link of these two projects were listed below: <https://ngdc.cncb.ac.cn/gsa/search?searchTerm=CRA012747> and <https://ngdc.cncb.ac.cn/bioproject/browse/PRJCA019962>.

Research involving human participants, their data, or biological material

Policy information about studies with [human participants or human data](#). See also policy information about [sex, gender \(identity/presentation\), and sexual orientation](#) and [race, ethnicity and racism](#).

Reporting on sex and gender

Reporting on race, ethnicity, or other socially relevant groupings

Population characteristics

Recruitment

Ethics oversight

Note that full information on the approval of the study protocol must also be provided in the manuscript.

Field-specific reporting

Please select the one below that is the best fit for your research. If you are not sure, read the appropriate sections before making your selection.

☒ Life sciences ☐ Behavioural & social sciences ☐ Ecological, evolutionary & environmental sciences

For a reference copy of the document with all sections, see nature.com/documents/nr-reporting-summary-flat.pdf

Life sciences study design

All studies must disclose on these points even when the disclosure is negative.

Sample size

Data exclusions

Replication

Randomization

Blinding

Reporting for specific materials, systems and methods

We require information from authors about some types of materials, experimental systems and methods used in many studies. Here, indicate whether each material, system or method listed is relevant to your study. If you are not sure if a list item applies to your research, read the appropriate section before selecting a response.

Materials & experimental systems

n/a	Involved in the study
☒	☐ Antibodies
☒	☐ Eukaryotic cell lines
☒	☐ Palaeontology and archaeology
☒	☐ Animals and other organisms
☒	☐ Clinical data
☒	☐ Dual use research of concern
☐	☒ Plants

Methods

n/a	Involved in the study
☒	☐ ChIP-seq
☒	☐ Flow cytometry
☒	☐ MRI-based neuroimaging

Dual use research of concern

Policy information about [dual use research of concern](#)

Hazards

Could the accidental, deliberate or reckless misuse of agents or technologies generated in the work, or the application of information presented in the manuscript, pose a threat to:

No	Yes
☒	☐ Public health
☒	☐ National security
☒	☐ Crops and/or livestock
☒	☐ Ecosystems
☒	☐ Any other significant area

Experiments of concern

Does the work involve any of these experiments of concern:

No	Yes
☒	☐ Demonstrate how to render a vaccine ineffective
☒	☐ Confer resistance to therapeutically useful antibiotics or antiviral agents
☒	☐ Enhance the virulence of a pathogen or render a nonpathogen virulent
☒	☐ Increase transmissibility of a pathogen
☒	☐ Alter the host range of a pathogen
☒	☐ Enable evasion of diagnostic/detection modalities
☒	☐ Enable the weaponization of a biological agent or toxin
☒	☐ Any other potentially harmful combination of experiments and agents

Plants

Seed stocks	The multi-petal cultivar “Hutou” (<i>Jasminum sambac</i> var. <i>Trifoliatum</i>) was conserved at the Botanical Garden of Minrong Tea Industry Co. Ltd, Fuzhou, China, under the specimen voucher number GDHTML3.
Novel plant genotypes	In this study, no novel plant genotypes were generated.
Authentication	No authentication procedures were implemented in this study.
