

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Table summarising each ecosystem service indicator, any additional processing requirements, and its source.

File Name: Supplementary Data 2

Description: Dataset showing for each delta average values of ecosystem service indicators, modification indicators, and bundles, which deltas were beyond the decoupling threshold, and into which stage of modification each delta was categorised. From this data, analyses can be performed to produce Tables 1, 2 and 3, and Figures 2 and 3.
