

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Location, physio-chemistry and geochemical composition of Piton de la Fournaise cold waters. The relative probability of the presence of a hydrothermal component (normalized hydrothermal index 1 HInorm) computed from the geochemistry is also given. This data is also available through IPGP Research Collection (research-collection.ipgp.fr) at the following DOI: <https://doi.org/10.18715/IPGP.2023.lq6ndlzz>.
