

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Number of reported cases over 15 years old, number of people sampled as part of the seroprevalence survey, and number of RVFV IgG positive people, by week and by geographical area (i.e. by subpopulation). For reported cases, we considered the week of symptoms onset or, if missing, the week of RT-PCR confirmation. For the seroprevalence study, we considered the week of sampling.
