

Description of Additional Supplementary files

File name: Supplementary Data 1

Description: Cohort and tissue sample information.

File name: Supplementary Data 2

Description: HIV-1 integration site profiles in different tissues in common genomic features.

File name: Supplementary Data 3

Description: HIV-1 integration site profiles in different tissues in non-B DNA features.

File name: Supplementary Data 4

Description: List of overlapping integration sites between tissues and between individuals.

File name: Supplementary Data 5

Description: Genes targeted for integration.

File name: Supplementary Data 6

Description: Expression levels of genes targeted for integration.
