

Appendix for Receptor-mediated cargo hitchhiking on bulk autophagy

Table of Contents	Page
Appendix Fig S1	1
Appendix Fig S2	2
Appendix Fig S3	3

Appendix Figure S1

Appendix Figure S1 Hab1-GFP cleavage during nitrogen-starved cells (related Fig 4)

GFP cleavage assay of Hab1-GFP-expressing WT, *atg1Δ*, *atg2Δ*, and *atg15Δ* cells at indicated time points of nitrogen starvation. Related to Fig 2C.

Appendix Figure S2

Appendix Figure S2 Full-length Hab1 also binds specifically to Atg8-PE (related Fig 2C)

Binding of Atg8 to Hab1-GFP assessed by immunoprecipitation. Samples were obtained from cells treated with rapamycin and PMSF (1 mM) for 1 h before being subjected to immunoblotting.

Appendix Figure S3

Appendix Figure S3 Hab1 does not involved in bulk autophagy activity

Measurement of autophagy activity by ALP assay in Pho8Δ60 expressing WT, *hab1Δ*, and *atg2Δ* cells.
