

Appendix for

A dynamic feedback loop between retrograde sterol transport and TORC2 controls adaptation of the plasma membrane to stress

Maria G. Tettamanti^{1,2}, Paulina Nowak^{1,2}, Beata Kusmider¹, Jennifer M. Kefauver^{1,4[¶]}, Vincent Mercier³, Aurélien Roux^{2*}, Robbie Loewith^{1*}

Table of contents

Appendix Table S1	2
-------------------------	---

Appendix Table S1: Drug / substance stocks used in this study

substance	stock
Rapamycin	200 μ M in DMSO
CK-666	125 mM in DMSO
Atorvastatin	20 mM in DMSO
Fluconazole	20 mM in DMSO
Carnitine	10 mM in PBS
Palmitate (C16)	10 mM in DMSO
Palmitoylglycine (C16-Glycine)	10 mM in DMSO
Palmitoylglycerol (C16-Glycerol)	10 mM in DMSO
Palmitoylcholine (C16-Choline)	10 mM in DMSO
PAF	10 mM in DMSO
LauroylCarnitine (C12-C)	10 mM in MeOH
MyristoylCarnitine (C14-C)	10 mM in MeOH
PalmitoylCarnitine (C16-C)	10 mM in DMSO, or MeOH (only SAR screen)
StearoylCarnitine (C18-C)	10 mM in MeOH
OleoylCarnitine (C18:1-C)	10 mM in MeOH
L- <i>erythro</i> -DHS	5 mM in DMSO
D- <i>erythro</i> -DHS	5 mM in DMSO
PHS	10 mM in DMSO
