

Lim et al Table\_EV3

| Parameter                                                        | Symbol       | Value |
|------------------------------------------------------------------|--------------|-------|
| Number of cells to ablate                                        | N_debris     | 10    |
| Purse string tension                                             | k_lt_ps      | 3E-05 |
| Lateral cables tension                                           | k_lt_lc      | 7E-05 |
| Debris volume elasticity                                         | lambda_v_deb | 1E-08 |
