

Figure S2 — D_{pred} values

Plot of the average distance of predicted contacts, D_{pred} , for each decoy set. Rank 1 is the native structure; from rank 2 the order is as provided by the server GRAMM-X. Black, blue, green and red symbols correspond respectively to solution with $f_{nc} = 0$, $f_{nc} > 0$, $f_{nc} > 0.1$ and $f_{nc} > 0.5$. The best model provided by GRAMM-X (in terms of f_{nc}) is displayed with a square.
