■ 2

MSX1
keratin 5
connexin 43
ubiquitin-conjugating enzyme E2D2
osteoprotegerin
ESTs
versican
ESTs
glutathione S-transferase M3
ESTs
MSX2
ID2
purinergic receptor family A group 5
MSX2
FZD7
ESTs
solute carrier
ESTs
glycophorin C Gerbich blood group
latrophilin
myotubular myopathy 1
eukaryotic translation initiation factor 2
nuclear receptor
nuclear receptor coactivator 3
ESTs
ESTs
signal recognition particle 19kD
butyrate response factor 1
SRY sex-determining region Y-box 9
KIAA0244 protein
nucleophosmin nucleolar phosphoprotein (NPM)
TLE
Cbp/p300-interacting transactivator
Cyclin D
b-TrCP
proprotein convertase subtilisin/kexin
eukaryotic translation initiation factor 3
ribosomal protein L27a
phosphoinositide-3-kinase, regulatory subunit
inhibitor of growth family, member 1
solute carrier family 2
MYC
ID3
small nuclear ribonucleoprotein
neutral sphingomyelinase N-SMase
endothelin receptor type B
cleavage stimulation factor
