A
PPAR signaling pathway
Long-term depression
Cytokine-cytokine receptor interaction
Aldosterone-regulated sodium reabsorption
Phosphatidylinositol signaling system
Axon guidance
Gap junction
Leukocyte transendothelial migration
Type II diabetes mellitus
Progesterone-mediated oocyte maturation
Vascular smooth muscle contraction
Antigen processing and presentation
Fc gamma R-mediated phagocytosis
Fc epsilon RI signaling pathway
Hedgehog signaling pathway
Insulin signaling pathway
Oocyte meiosis
Spliceosome
Base excision repair
Natural killer cell mediated cytotoxicity
Regulation of actin cytoskeleton
Gastric acid secretion
Module9
mTOR signaling pathway
Module11
Module4
VEGF signaling pathway
Homologous recombination
Calcium signaling pathway
Dorso-ventral axis formation
Module7
Melanogenesis
Module1
Module3
Phagosome
Module10
Mismatch repair
GnRH signaling pathway
Neurotrophin signaling pathway
Module8
Module12
Proteasome
Metabolic pathways
Module2
Adherens junction
p53 signaling pathway
Toll-like receptor signaling pathway
Long-term potentiation
ECM-receptor interaction
Focal adhesion
Protein processing in endoplasmic reticulum
Nucleotide excision repair
Cell cycle
NOD-like receptor signaling pathway
Apoptosis
Notch signaling pathway
Adipocytokine signaling pathway
Wnt signaling pathway
Vasopressin-regulated water reabsorption
Tight junction
T cell receptor signaling pathway
ErbB signaling pathway
Chemokine signaling pathway
Non-homologous end-joining
RIG-I-like receptor signaling pathway
B cell receptor signaling pathway
Ubiquitin mediated proteolysis
Circadian rhythm - mammal
TGF-beta signaling pathway
MAPK signaling pathway
Endocytosis
Jak-STAT signaling pathway
Cytosolic DNA-sensing pathway
Ribosome
Module6
Module5
B
Dorso-ventral axis formation
Gap junction
Fc gamma R-mediated phagocytosis
Natural killer cell mediated cytotoxicity
Regulation of actin cytoskeleton
Leukocyte transendothelial migration
Endocytosis
Insulin signaling pathway
GnRH signaling pathway
VEGF signaling pathway
Fc epsilon RI signaling pathway
Progesterone-mediated oocyte maturation
B cell receptor signaling pathway
Chemokine signaling pathway
Apoptosis
Adipocytokine signaling pathway
Toll-like receptor signaling pathway
NOD-like receptor signaling pathway
RIG-I-like receptor signaling pathway
Tight junction
Long-term potentiation
Melanogenesis
Jak-STAT signaling pathway
Wnt signaling pathway
TGF-beta signaling pathway
Notch signaling pathway
Cell cycle
Axon guidance
Ubiquitin mediated proteolysis
Protein processing in endoplasmic reticulum
Antigen processing and presentation
Cytosolic DNA-sensing pathway
Oocyte meiosis
mTOR signaling pathway
Long-term depression
Vascular smooth muscle contraction
p53 signaling pathway
Gastric acid secretion
Calcium signaling pathway
Phagosome
Spliceosome
Phosphatidylinositol signaling system
Vasopressin-regulated water reabsorption
Type II diabetes mellitus
Aldosterone-regulated sodium reabsorption
Citrate cycle (TCA cycle)
Pyruvate metabolism
Glycolysis / Gluconeogenesis
Porphyrin and chlorophyll metabolism
Cell adhesion molecules (CAMs)
Lysosome
Complement and coagulation cascades
Type I diabetes mellitus
Metabolic pathways
Pyrimidine metabolism
Purine metabolism
RNA polymerase
Peroxisome
Fatty acid metabolism
Propanoate metabolism
RNA degradation
SNARE interactions in vesicular transport
Fructose and mannose metabolism
Oxidative phosphorylation
Ribosome
Olfactory transduction
Regulation of autophagy
Cardiac muscle contraction
Circadian rhythm - mammal
Hedgehog signaling pathway
PPAR signaling pathway
Proteasome
Cytokine-cytokine receptor interaction
Mismatch repair
Homologous recombination
Base excision repair
Nucleotide excision repair
Non-homologous end-joining
ECM-receptor interaction
MAPK signaling pathway
T cell receptor signaling pathway
ErbB signaling pathway
Focal adhesion
Neurotrophin signaling pathway
Adherens junction
