

Enriched with Differentially Methylated Genes

- ☐ Immune-response related
 1. Chemokine and cytokine activity
 2. Responses to stimulus and inflammation
 3. Receptor binding activities
- ☐ Peptidase activities
- ☐ Metabolic activities
- ☐ Epidermis development
- ☐ Morphogenesis
- ☐ Homeobox
- ☐ Nerve development
- ☐ Embryonic development
- ☐ Voltage-gated potassium channels
- ☐ Sequence-specific Transcription Factors

Depleted with Differentially Methylated Genes

- ☐ Cell Cycle
- ☐ DNA repair
- ☐ Protein modification
- ☐ RNA activities
- ☐ Transcription Factors

Depleted Enriched

None
