

A aged WT mice network

extracellular matrix / complement signaling

cell motility & adhesion

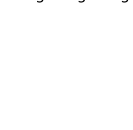

anti-apoptotic signaling

GTPase signaling

cytokine / insulin / integrin signaling

electron transport

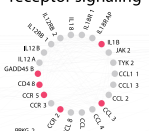

B ERCC1^{-Δ} mice network

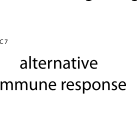

cell cycle regulation / mitosis

insulin / chemokine receptor signaling

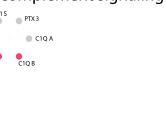

immune signaling

alternative immune response

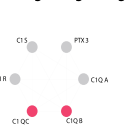

extracellular matrix / complement signaling

C Overlapping Genes aged WT and ERCC1^{-Δ} mice network

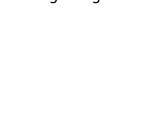

cytokine signaling integrin signaling

complement signaling

anti-apoptotic signaling

chemokine receptor signaling

insulin signaling
