Cell division
Fimament formation and cell polarity
Transcription and translation control
Intracellular signal transduction
Cytoskeleton
Guanyl nucleotide exchange factor (GEF)
Cell cycle
Nuclear transport
DNA synthesis
Protein / peptide degradation
Biosynthesis of amio acid
Protein transport
Transcription initiation
Aminoacyl-tRNA synthesis
Protein synthesis
Degradation of amio acid
Exocytosis
Secondary metabolism
G-protein mediated signal transduction
Sugar glucoside catabolism
Transport facilitation
Decoxification
Lipid fatty acid metabolism
Cellular export and secretion
Drug / toxin transport
Stress response
Vacuolar / lysosomal transport
TCA cycle
Homostasis of metal ions
Pheromone response
Regulation of carbohydrate metabolism
Secretion proteins
C-compound and carbohydrade transport
Small GTPase mediated signal transduction
Transport fatilization
Amio acid transport
Non vesicular cellular import
