

Supplemental Figure 3 Construction of BLRP-MKL1-BirA stable cell lines

(A) and (B) mRNA expression levels of BLRP and MKL1 was analyzed by Q-PCR, respectively. The expression levels of BLRP and MKL1 in BLRP-MKL1-BirA stable cell lines were compared to those in BirA parent cell lines, without or with zymosan treatment for 1 h. (C) Western blots for MKL1 were performed in BLRP-MKL1-BirA stable cell lines and the BirA parent cell lines.
