

Additional File 6 - Phenotypes and Chl-a fluorescence images of wild-type and mutant plants

Phenotypic appearance as well as modulated Chl-a fluorescence false color images of the F_v/F_m ratio of the same lines grown in HL or LL for four weeks. (A) *pgi1-1*, *pgm1*, *pgi1-1/tpt-2*, *tpt-2/pgm1*, (B) *mex1-2*, *mex1-2/tpt-2*, (C) *sex1-3*, and *sex1-3/tpt-2*. The color scale indicates the numeric values of the F_v/F_m ratios.
