

We are now interested in the angle at your feet when you are **walking** (that is straight, turned in or turned out feet) as this may have relevance to the development of OA. Please look at your feet **whilst walking** and tick the appropriate box to indicate the angle of your feet.

Most people will have similar angulations in their left and right feet, but in a few people these angulations may differ. We therefore would like you to score your feet separately.

Which picture best shows the **current** angle of **each** of your feet?

Right foot ► ☐ A ☐ B ☐ C ☐ D ☐ E

Left foot ► ☐ A ☐ B ☐ C ☐ D ☐ E
