

Review	No. I DBs	references found (w or w/o doublets unknown)		references included	precision %
		w doublets	w/o doublets		
1 arroll	2 (?) controlled trials register: strategy available X inconsistent about inclusion of additional 6 DBs	--	--	14	--
2 sinclair	5 (+1 study register)	517		49	9.4
3 mcqueen new Issue 2011	5 (+1 study register)		636 614 (DBs) + 22 other	14 (in older Issue only 11)	2.2
4 bar-on new Issue 2012	3 (+1 study register)	246		20	8.1
5 bohlius	3 (+ conference proceedings + ESA trials)	5546 (+ ongoing: 575)	--	48 (Gehanno only 39 due to excluded abstracts)	0.9
6 boehm	7	675		51	7.6
7 guimaraes	5	775		11	1.4
8 verbeek new Issue 2012	8 or 14 (+ 1 study register). Inconsistent listing	2491 references (1360 in 2009 plus 1129 in 2012), of which 1198 came from a combined search of MEDLINE and EMBASE using Ovid, 86 from CINAHL, 76 from CENTRAL and nine from the COHF database up until 2005. An additional search from 2005 to December 2008 yielded an additional 256 references. The update in January and February 2012 for references from 2009 to 2012 brought 54 new references from PubMed, 299 from EMBASE, 601 from Web of Science, 168 from NIOSH/TIC and 7 references from reference lists of articles.		24 (One article described two trials and two articles described the same study. This resulted in 25)	1.0
9 yip	7	--		17	--
10 okebe neue Version 2011	5 (+ 2 study registers)	resulting in a large number of publications		70	--
11 ipser	4 (+ various study registers)	1395 sum of single DB hits (+ ongoing: 655 + 193)		22 (Gehanno 25: possible due to inclusion of more than one reference per trial)	1.6
12 sultan	4	--	--	11	--
13 oduyebo	5 (+ conference proceedings)	701		24	3.4
14 mestre	3 (+ 1 study register + handsearch etc.)	102		21 (Gehanno 20) Only published references, not personal communication	20.6
