

Example

1.0 1.2 1.4

Please circle the hatch mark and number representing the serum creatinine level at which you believe, ideally, the primary care physician should refer a patient [like the patient in the scenario] to a nephrologist.

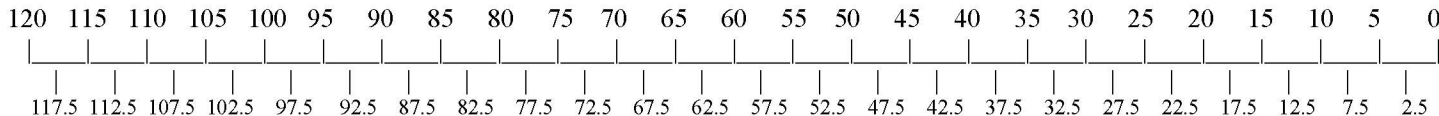

Serum Creatinine (mg/dL)

Example

65 60 55

Please circle the hatch mark and number representing the glomerular filtration rate (GFR) at which you believe, ideally, the primary care physician should refer a patient [like the patient in the scenario] to a nephrologist. Please round to nearest number available.

GFR (mL/min/1.73 m²)
