

Vaccinated Group

2001 – 2004

Enrolled N=99

First examination <4 months
of age & included in time to first
OME analysis n=90 (91%)
Clinical assessment n=97 (98%)

Examined less than:
2 months of age n=75 (76%)
4 months of age n=85 (86%)
6 months of age n=94 (95%)
8 months of age n=97 (98%)

Examined greater than:
12 months of age n=66 (67%)
15 months of age n=57 (58%)
18 months of age n=49 (49%)

Comparison Group

1996 – 2001

Enrolled N=126

Randomised N=103

First examination <4 months
of age and included in time to first
OME analysis n=70 (68%)
Randomised to placebo n=51
Clinical assessment n=51 (100%)

Examined less than:
2 months of age n=25 (49%)
4 months of age n=37 (73%)
6 months of age n=41 (80%)
8 months of age n=48 (94%)

Examined greater than:
12 months of age n=36 (71%)
15 months of age n=32 (63%)
18 months of age n=27 (53%)
