

General practice and primary care

- First contact, continuous, comprehensive and coordinated care
- Undifferentiated by gender, disease or organ system

Primary Care Amplification Model

- Internal and external support for practice
- Expanded clinical model
- Governance for local community needs
- Infrastructure for scope of practice

'Beacon' practice

- Supports/extends local practices' capacity
- Serves a local population of clinical need
- Under/postgraduate multidisciplinary teaching
- Local clinical research
- Improves integration with secondary care
