A Week -1, 3, 7, 21, 34 = Salivary cortisol A¹, VAS^{max}-scale³, UPDRS I-IV⁴ (at screening, week 7, 11 and 21), Drug list⁵

B week 0, 5 = Salivary cortisol B², VAS^{max}-scale³, Drug list⁵

C week 10, 14 = VAS^{max}-scale³, Drug list⁵

Explanations:

¹ = Salivary cortisol A: Salivary cortisol measured at 8am, 1pm, 8pm and 8am next day.

² = Salivary cortisol B: Salivary cortisol measured immediately before, immediately after and 30 minutes after intervention, respectively.

³ = Visual Analogue Scale, maximal pain for five consecutive days before intervention.

⁴ = Unified Parkinson Disease Rating Scale part I-IV.

⁵ = Drug list: Evaluation of the patient's actual pharmacotherapy.
