

Closed Habitats (4 habitats codes)

1: Pit latrines: dug in the ground and often contain water

2: Septic tanks:

- underground (closed) waste storage containers
- normally sealed but may have a small opening

3: Soakage pits: closed pits connected to the latrines and often contain water

4: Others:

- any other **closed** habitat that does not fall under the definitions above
- please describe the habitat in the comment section
