

Supplemental Figure 1. MCF-12A cells and HeLa cells transiently transfected with GFP alone, GFP-SAR, GFP-NES-SAR, or GFP-NLS-SAR. Left column: Direct fluorescence imaging of MCF-12A cells transfected with GFP-SAR constructs, as indicated. Arrows – transfected cells, asterisks – cells that rounded up. Middle column: Corresponding brightfield images of transfected MCF-12A cells. Right column: Direct fluorescence imaging of HeLa cells transfected with GFP-SAR constructs, as indicated.
