

A

Functional assignment

- TGF-beta signaling pathway
- Signal transduction
- Regulation of transcription
- DNA binding
- Extracellular matrix and/or cytoskeleton
- Nucleotide metabolism
- Uncharacterized
- Other

Functional associations

- In vivo protein-protein interaction
- In vitro (Y2H) protein-protein interaction
- Biochemical interaction

Validated and non-validated (passenger) gene mutations

- Breast cancer validated
- Breast cancer non-validated
- Colorectal cancer validated
- Colorectal cancer non-validated

B
