

Supplementary Figure 4: Hct116 p21^{+/+} and p21^{-/-} cells were infected with *d/922-947* (MOI 10). Intracellular viral replication (left) and titre of virus released into supernatant (right) was assessed up to 72h pi by TCID₅₀ assay. Horizontal line represents input dose. *, $p < 0.05$. **, $p < 0.01$.
