

Scatter plot showing Mitotic index (Y-axis, 0 to 45) for three groups: LT (Lactin-treated), PH (Phalloidin-treated), and PH/TIPS (Phalloidin + TIPS-treated). The PH/TIPS group shows a significantly higher mitotic index compared to the other two groups, indicated by the asterisk (*).

Group	Mitotic index (Mean ± SEM)
LT	0.5 ± 0.5
PH	1.0 ± 0.5
PH/TIPS	7.5 ± 1.0*

Scatter plot showing inflammation grade (Y-axis, 0 to 4) for three groups: LT (Liver Transplantation), PH (Portal Hypertension), and PH/TIPS (Portal Hypertension with Transjugular Intrahepatic Portosystemic Shunt). The plot displays individual data points and horizontal lines representing the mean inflammation grade for each group.

Group	Inflammation Grade
LT	0, 1, 1, 2, 2, 3
PH	0, 0, 1, 1, 1
PH/TIPS	1, 2, 2, 2, 2, 3
