

n with data (anxiety, depression respectively)

Exenatide BID	N/A	563	516	605
Insulin	N/A	666	605	532

Mean (SD) baseline scores were:

HADS Anxiety: exenatide BID, 6.38 (4.40); insulin, 6.96 (4.59)

HADS Depression: exenatide BID, 5.44 (4.09); insulin, 6.04 (4.35)

Lower scores indicate lower levels of emotional distress. HADS Anxiety and Depression were not applied in Germany.
