

206 follicular fluids sampled

2 discarded due to blood contamination

177 with oocyte presence

27 without oocyte presence

due to some samples' shortage

171 assayed for estradiol, progesterone and testosterone

4 assayed for progesterone and testosterone only

2 assayed for testosterone only

Table 1

Table 1 and Table 3

19 assayed for estradiol, progesterone and testosterone

5 assayed for progesterone and testosterone only

3 assayed for testosterone only

Further studied the fertilization success rates in five size groups

Table 2
