

Additional File 4. Expression levels of platelet-specific glycoproteins. (A)

Expression levels of GPIIb/IIIa (integrin α IIb β 3) (left panel), GPIb (middle panel), and GPVI (right panel) in control (dark gray) and paxillin-knockdown platelets (light gray).

(B) Columns and error bars represent the mean $\pm$ s.d. of the mean fluorescence intensity (MFI) of antibody binding ($n = 5$). Statistical significance was determined using Student's t test. * $P < 0.05$, ** $P < 0.01$, and *** $P < 0.001$ vs. control.
