

**205E**  
**340M**

Western blot analysis showing p38 phosphorylation in various cell lines. The lanes from left to right are: Jurkat, K562, K562 + IL-3, K562 + IL-3 + IL-6, and K562 + IL-3 + IL-6 + IL-1. The blot shows a single band for p38 in each lane, with varying intensities indicating different levels of phosphorylation.
