

Studies 1 and 2

- 1. Staff Survey
- 2. Staff Qualitative Interviews

Study 3

Implement Patient intervention

Study 3

- Analysis of data related to implementation of patient intervention:
- Outcomes
 - Costs

Time 1
~6 months

Time 2
~24 months

Time 3
~12 months

Goal 1: Collect data on facility characteristics that may be associated with successful implementation

Goal 2 Implement Intervention:
Implement nurse-directed telephone call intervention
-12 month of starting patients who are followed for 12 months

Goal 3 Impact of Intervention:

1. Impact of intervention on BP between facilities
2. Impact of intervention on BP within facility
3. Cost effectiveness of intervention

Study 1: Hypertension telemedicine nurse implementation project for veterans (HTN Improve)—staff survey

Study 2: Hypertension telemedicine nurse implementation project for veterans (HTN Improve)—qualitative interview

Study 3: Hypertension telemedicine nurse implementation project for veterans (HTN Improve)—patient self-management program
