E-step for read classes:

initialize all $n(j)$ to 0

for each read class R **do**

  sum $= \sum_{j:w_{R,j}>0} w_{R,j} f(j)$

  for each isoform j with $w_{R,j} > 0$ **do**

    $n(j) += m(R) * w_{R,j} f(j)/\text{sum}$

  end for

end for
