

Pathway maps generator setup

Before starting to generate pathway-maps you can adjust the following default query:

Max number of steps from source to target:

9

Max size of map in nodes:

70

Conditions for source nodes:

Name == GRIN2A

OR

OR

OR

AND

Conditions for target nodes:

Location == Vesicles

OR

OR

OR

☒ Include only direct interactions

Warning!!! If the search query is very general and the network is large, drawing the pathways may take several hours.
