Diagram illustrating a 5' to 3' RNA hairpin structure. The sequence is shown with dashes indicating the 5' and 3' ends. The structure consists of a stem-loop followed by a single-stranded tail. The stem is formed by base pairing between the sequence AGUGCACCCAGGCAAGGA (top) and AGUGCACCCAGGCAAGGAUUC (bottom). The loop is formed by the sequence AGUGCACCCAGGCAAGGAUUC. The single-stranded tail is UGCACCCAGGCAAGGAUUC. The sequence is: 5' AGUGCACCCAGGCAAGGA-3' (top strand), 3' AGUGCACCCAGGCAAGGAUUC-5' (bottom strand). The loop is AGUGCACCCAGGCAAGGAUUC. The tail is UGCACCCAGGCAAGGAUUC.

The diagram illustrates how the same nucleotide sequence can be interpreted differently depending on the starting point (reading frame). The sequence shown is: -UGAAUGUGUAGCAAAAAGACAGA-.

- Top row:** Shows the sequence starting at the first position. The start codon UGA is underlined, followed by AUGUGUAGCAAAAAGACAGA. A value of 13 is indicated below the sequence.
- Second row:** Shows the sequence starting at the second position. The start codon AAU is underlined, followed by GUGUAGCAAAAAGACA. A value of 5 is indicated below the sequence.
- Third row:** Shows the sequence starting at the third position. The start codon AUG is underlined, followed by GUAGCAAAAAGACAG. A value of 8 is indicated below the sequence.
- Fourth row:** Shows the sequence starting at the fourth position. The start codon UGC is underlined, followed by AAAAAAGACAGA. A value of 55 is indicated below the sequence.
- Fifth row:** Shows the sequence starting at the fifth position. The start codon AAA is underlined, followed by AAGACAGAA. A value of 17 is indicated below the sequence.
- Sixth row:** Shows the sequence starting at the sixth position. The start codon AAG is underlined, followed by ACAGAAa. A value of 5 is indicated below the sequence.
- Seventh row:** Shows the sequence starting at the seventh position. The start codon ACA is underlined, followed by AGAGAAU. A value of 20 is indicated below the sequence.
