

Additional file 3. Unrooted Neighbor-joining tree of 1600 bp sequences from the 3' end of *Pokey* elements. Elements from the *Daphnia* genome sequence and cloned from other species in the subgenus *Daphnia* [7] are included. The latter are preceded by PC. All positions containing alignment gaps and missing data were eliminated in pairwise sequence comparisons. Bootstrap values greater than 70 are shown at the nodes in the tree.
