

Model for CS+ response during %Renewal	
Factors	Variables chosen for model
Psychological variables entered stepwise: BAI, STAI, NEO, MSIT, EST	Extraversion $\beta = -0.360$ $p = 0.009$
Physiological and demographic variables entered stepwise: UCR, SCL, sex, age	Sex $\beta = 0.330$ $p = 0.016$
Adjusted $R^2 = 0.242^{**}$
