

Additional data file 8

Log R ratios and B allele frequencies for chromosomes affected by chromothripsis. (A) Chr1 cluster, patient 3, metastasis. (B) Chr8 cluster, patient 4, primary tumor. (C) and (D) Chr3-6 cluster, patient 4, primary tumor. (E) and (F) Chr17-21 cluster, patient 4, metastasis. (G) and (H) Chr15-20 cluster, patient 3, primary tumor. (I) Chr13 cluster, patient 1, primary tumor. Vertical lines indicate the boundaries of complex clusters. Chromosome ideograms are depicted in the horizontal bar at the top of each panel.
