

Animal # :	Cage:
------------	-------

Date:

Pre-SAH	Day 2	Day 7	Day 14

Spontaneous activity (3 min)				
0: No movement				
1: Minimal movement				
2: Touches 1–2 walls				
3: Touches 3–4 walls while standing on hind limbs				

Climbing (1 min)				
0: Weak grip and falls down				
1: Climbs but does not reach top and weak grip				
2: Climbs to top and weak grip or does not climb to top and good grip				
3: Climbs to top and strong grip				

Balance				
0: Tumbles				
1: Stands, sways				
2: Sways as walking				
3: Changes position easily				

Side stroking				
0: No response				
1: Unilateral response				
2: Bilateral weak response or strong ipsilateral response				
3: Strong bilateral response				

Vibrissae touch (stroke whiskers)				
0: No response				
1: Unilateral response				
2: Weak bilateral response				
3: Strong bilateral response				

Visual (tip toward each eye)				
0: No response				
1: Unilateral response				
2: Weak bilateral response				
3: Strong/rapid bilateral response				

Forelimb use				
0: Severe bilateral deficits				
1: Severe unilateral deficits				
2: Slight deficits (unilateral or bilateral)				
3: None				

Hind limb use				
0: Severe bilateral deficits				
1: Severe unilateral deficits				
2: Slight deficits (unilateral or bilateral)				
3: None
