

I

*S100 proteins,
endosomes,
lipoprotein
metabolism*

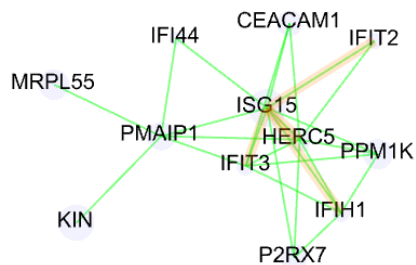

K

*Cholesterol, sterol
biosynthesis*

L

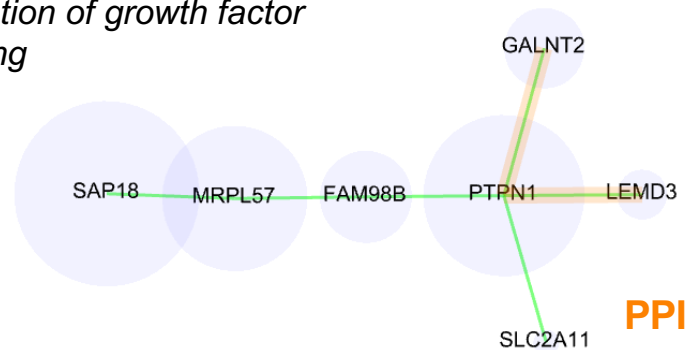

*Interferon
response*

PPI

M

*Regulation of growth factor
signaling*

PPI

Figure S7. Gene communities I, K, L and M (see Table 1) from cell cluster 1.2. Genes and links are highlighted as in Fig. S4. In communities L and M, links supported by known protein-protein interactions are highlighted in brown.
