

Table S1. Taxonomic designation, sampling location, shell voucher specimen catalogue number (UMMZ: University of Michigan Museum of Zoology; MNHN: Muséum National d'Histoire Naturelle, Paris; FMNH: Field Museum of Natural History, Chicago; FLMNH: Florida Museum of Natural History) and GenBank Accession numbers (applied for) for every partulid mt COI haplotype employed in the study and incorporated into the phylogenetic trees shown therein. Museum specimens are indicated in black text, captive zoo specimens are indicated in red text and samples obtained more recently (since 2002) from remnant wild populations are indicated in blue text. Shell voucher numbers were not available for biopsied wild samples, nor for a small number of UMMZ Society Island samples that were damaged during the tissue extraction and lyophilization processes.

Species	Island	Valley Name (if available)	Locality #	Collector, Year	# of snails genotyped for COI	Haplotype #	Voucher number	GenBank Accession #	# of snails genotyped for 28S	GenBank Accession #
