

Additional File 13. Table on the statistical results for the pairwise comparisons of *C. elegans* survival rates on *P. aeruginosa* PA14

Comparison	χ^2	<i>p</i>
N2 vs. CB4856	58.32	<0.0001
N2 vs. <i>npr-1(ur89)</i>	93.38	<0.0001
N2 vs. <i>npr-1(ad609)</i>	93.01	<0.0001

Survival curves were calculated with the Kaplan-Meier method and the Log-rank test was used for each pairwise comparison separately. Significant probabilities are given in bold. Significance level was adjusted using Bonferroni correction for multiple pairwise comparisons.
