

57,504 ROCs (Diffbind Consensus Peakset)

28,635 ROCs either **within or 2 kb upstream** of protein-coding (non-mitochondrial or Y chromosome) genes

26,518 ROCs within 2 kb upstream of a protein coding gene were closest to a gene expressed in the BLN

27,061 ROCs located **within** protein-coding (non-mitochondrial or Y chromosome) genes

25,192 ROCs within a protein coding gene were closest to a gene expressed in the BLN

ROC = Region of open chromatin, BLN =Bronchial lymph node
