

Supplemental Figure 3: Nematode Mitogenome Characteristics and Substitution Rates by Reproduction

SI Figure 3: Nematode Mitogenome Characteristics by Reproduction

Box and whisker plots for total genome and PCG characteristics for A) size, B) %GC content, C) GC compositional skew, and D) substitution rates for PCG sequences for the Nematoda phylum. Medians and quantiles were calculated for each characteristic based on the life trait classification for Reproduction strategy. Phylum level reproduction strategy was not significant for any characteristic.
