

Supplemental Figure 14: *Spirurina* Mitogenome Characteristics and Substitution Rates by Habitat

SI Figure 14: *Spirurina* Mitogenome Characteristics by Habitat

Box and whisker plots for total genome and PCG characteristics for A) size, B) %GC content, C) GC compositional skew, and D) substitution rates for PCG sequences for the *Spirurina* suborder. Medians and quantiles were calculated for each characteristic based on the life traits classification for preferred Habitat. *Spirurina* habitats were significant for genome GC skews, PCG GC skews, dN rates, and dS rates.
