

#### **Additional file 7: Validation of RNA-Seq data by RT-qPCR analysis on a selected number of ISGs.**

The expression levels of the following genes were analyzed by RT-qPCR and compared to RNA-Seq data: *beta-actin* (gene-actb2, LOC120489986 and gene-actb1, LOC120463340), *mx1* (gene-mx1, LOC120468849), *viperin* (gene-rsad2, LOC120476724), *pkr* (gene-eif2ak2, LOC120460990) and *stat2* (gene-stat2, LOC120491376). Orange and blue bars represent RNA-Seq data and RT-qPCR results, respectively.
