

Supplemental Figure 2: Gating strategy for the identification of T lymphocyte sub-populations. Blood cells were stained with DRAQ-5, and different fluorochrome-conjugated antibodies (FITC-anti CD4, PE-anti CD8 and PerCp anti-CD3) for flow cytometry analyses. Representative samples at t0 (A, B) and t1 (C, D) of HS^{LOW} (A, C) and HS^{HIGH} (B, D) piglets are shown.
